

Welcome at robos-labels

Labeling products in best quality

Robos-labels is a leading German manufacturer of labeling products at the gates of Stuttgart.

As an independent family business with customers in well over 30 countries, the company has been focused on labels for the technical and chemical industry as well as medical technology and the automotive industry since 1960.

Our team develops customized product solutions for you, often for complex technical labeling products and functional labels.

Requirements for our products

Resistance

High chemical, thermal and mechanical resistance for long-living labels and permanent legibility

Adhesive power

Adhesive properties based on requirements (e.g. high- or low-energy surfaces, application to rough and oily surfaces)

Conformities and labeling standards

UL, CSA, Intertek, sea water resistance, REACH, RoHs etc.

Quality control and documentation

Sampling procedures VDA/AIAG (EMPB, PPAP); inprocess controls

Our technologies

Printing methods

Silkscreen-, flexo- and digital printing

Processing

Laser- and conventional die-cutting

Further

layer/booklet production,
automated data processing

Prüftechnik

Various camera systems, digital measuring projector

Folit – our subsidiary

- Folit GmbH was founded in 1992 as a material trader for special and high-quality labeling foils.
- Purchasing of jumbo rolls of special and particularly durable raw materials by brand manufacturers like 3M, FLEXcon, Lintec and Tesa
- By stockpiling robos-labels has the possibility to access a wide range of high-quality special foils in order-related quantities and cuts.

A selection of our customers

BOSCH Group (technical industry)

Qiagen (medical technology and analytics)

Dürr Dental (technical industry and medical technology)

Festool (technical industry)

Siemens (technical industry)

ZF TRW (automotive industry)

Volkswagen (automotive industry)

Individual labeling solutions

Component coverage during the manufacturing process

Challenge: all openings must be temporarily closed during the surface handling. Our customer wanted a labeling set with strong adhesive during the handling and the possibility to remove it easily after the processing.
